Acrylic Marker Opacity Test Sheet

Use one color per sheet. Check how well the dry paint hides the same printed black line.

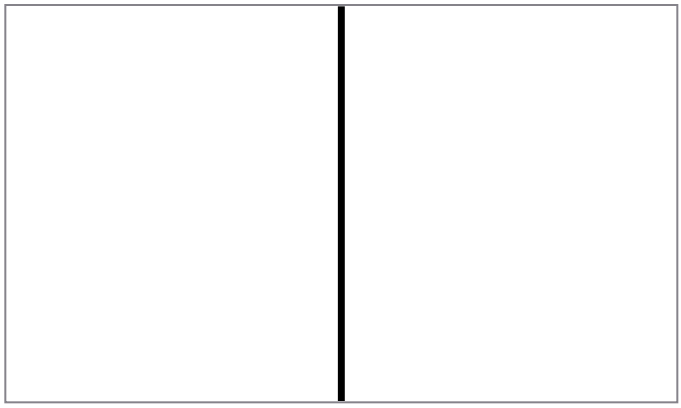
Brand / marker line _____ **Color / code** _____

Paper or card used _____ **Tip** _____

Make The Two Swatches

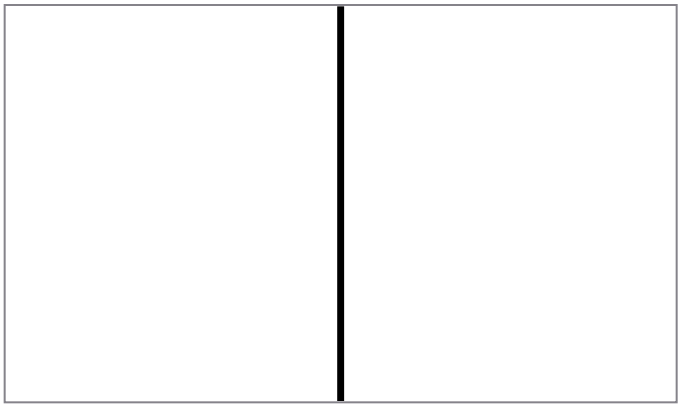
1. Follow the marker's startup directions. Test the flow on scrap first.
2. Draw one horizontal band across the black line in each box, using the same pressure.
3. Let both bands dry. Add one more band over the right swatch only. Judge both when dry.

One Pass



Dry line ☐ Visible ☐ Faint ☐ Hidden

Two Passes



Dry line ☐ Visible ☐ Faint ☐ Hidden

Wait before second pass _____ **Wait before reading** _____

Record your actual wait in minutes. A dry-looking swatch does not establish a full cure.

Repeat On Your Project Material

The printed black line is a contrast reference. For black card, cloth or a painted object, repeat both swatches on a spare piece of that actual material. Compare after drying.

Material / background color _____

Dry coverage or streaks _____
